CxC Smart WATER

Easy installation • Real-time data

Revolutionize the efficiency of water resource management
and obtain data with higher accuracy in measurement of water quality.

CxC IoT Application Factory platform

Benefits of Smart Water Solutions

How does it work?

Each sensor is attached to the Gateway and gathers the respective data. This data is then transferred to the cloud via Convergia's CxC SIM with wireless connectivity, where it is stored on our CxC IoT Application Factory platform, which monitors and displays the real-time data from each sensor.

Features

- Waterproof and Weatherproof IP65 Enclosure
- Integrated Temperature Compensation
- Minimal Maintenance Costs
- Robust Sensor Probes; PVC and Stainless Steel
- High Accuracy Sensors
- Usable on any cloud platform
- High-Quality Calibration
- Interoperability with any wireless technology
- LPWAN & Cellular Communication protocol for isolated locations
- Low Power Consumption
 - Long Battery life
 - Solar-Powered

Why should we monitor water?
